Technical Data Sheet

Anatase Titanium Dioxide JHA110

CAS number : 1346367-7
EC number : 236-675-5
CN code : 3206 11 00

Specification	Minimum	Maximum
Content of titanium dioxide, %	98,5	
PH value of aqueous suspension	6,5	8,5
Tinting Strength (Compared with the standard sample), %	100	
Oil absorption, g/100g		26
Residue on sieve (45 μ m), %		0,1
Water soluble, %		0,5
Volatile at 105, %		0,5

JHA110 is a kind of anatase titanium dioxide. It has excellent optical properties and high purity, good whiteness, good hiding power and high tinting strength properties.

Packing:

Our RJHA110 is delivered in 25 kg paper-plastic composite bags on pallets and in big bags.
Keep it in a dry and cool place.

Applications:

RJHA110 is used in interior coatings, interior decoration paints, rubbers, paper-making , leather, preparation of titanate.

Last revision: 09-2019
